FullStack Web Developer Remote (Node JS / MEAN Stack)

We are looking for a Senior Software Developer for Web MEAN stack who will work independently as well as with the stakeholders and will build and maintain a website remotely for a leading startup in Ireland.

Job Description

- A Senior Developer you should be proficient in Node JS and/or TypeScript. Should have Expert level knowledge of MEAN Stack for Web and essential knowledge for Mobile App development using Android SDK and relevant tools.
- Build and maintain existing web-based and mobile applications.
- Create APIs, web triggers, RESTful web services
- Participate in full-cycle development in an Agile environment with a development team
- Your primary focus will be on developing user interface components and implementing the following well known Node.js workflows Typescript, NestJS and/or ReactJS.
- You will ensure that these components and the overall application are robust and easy to maintain.
- Designing well-structured client-side routing systems for single page applications (SPA) along with designing stable and highly-scalable server-side RESTful APIs
- You will coordinate with the team working on different layers of the infrastructure.
- Therefore, a commitment to collaborative problem solving, sophisticated design, and quality deliverables are important.
- Stay up-to-date with development trends, cloud technologies, open source, and best practices.

You Should have

- 3+ years of professional experience with Node JS and/or TypeScript
- 3+ years of professional experience Angular and/or ReactJS, including Express
- Good English Communication (average will also work)
- MYSQL, MongoDB and Firebase Database design and development experience is a strong plus
- Modern development experience with the knowledge of principles and standards such as SOLID, KISS and DRY.
- Familiar with Git and other VCSs
- Experience designing software with performance in mind.
- Should have experience with Amazon AWS.
- Experience developing,deploying and monitoring production-ready MEAN/MERN stack applications.
- Work closely with all team members to understand full stack functionality and architecture.

- Gather requirements around functionality and translate those requirements into elegant functional solutions.
- Must be available immediately and work independently.
- Hey, one more thing.. You should love VSCode ;).. just kidding

Salary/Perks

- 100,000 to 120,000 PKR (DOE)
- Annual Appraisal
- Performance Bonus
